

Environmental Policy

Bridgeport Energy is committed to developing its hydrocarbon resources in an environmentally sound and diligent manner while minimizing the impacts of its operations. The Company and its contractors will:

- Ensure that all personnel are aware of the Company's environmental responsibilities and are properly trained to fulfil them;
- Manage environmental matters as a critical business activity and ensure that environmental protection has equal prominence with other business considerations in the decision making process;
- Comply with applicable environmental legislation, regulations and standards;
- Apply a systematic approach to reduce impacts to the biological, physical and social environments and ensure continuous improvement in environmental performance;
- Consider stakeholders and local community expectations and concerns, cultural heritage, short and long term benefits and costs and liabilities;
- Promote life-cycle resource efficiency by reducing energy consumption, and promoting resource reuse, recovery and recycling;
- Strive for continuous improvement in environmental performance and measure this by setting objectives and targets consistent with the aims of this policy.
- Monitor environmental effects and audit performance across all our operations.
- Support environmental research, education and training to promote an awareness ethic within the Company, its contractors and the wider community.
- Report environmental performance to the Board of Directors of the Company, who will ensure that necessary resources are provided to support implementation and compliance with this policy.
